4. V2.0 (Months 10-12): Advanced features, social sharing, partnerships
5. Scale: Series A funding, team expansion, market expansion

Financial Planning Templates

3-Year Financial Projection Template

Use this template to create your financial projections. Replace bracketed values with your actual numbers. Be conservative in your estimates and include a 15-20% buffer for unexpected expenses.

- Revenue Streams: List all sources of income
- Cost of Goods Sold (COGS): Direct costs associated with sales
- Operating Expenses: Rent, salaries, marketing, utilities, software
- Capital Expenditures: Equipment, website, initial inventory
- Cash Flow Projection: Monthly cash inflows and outflows
- Break-Even Analysis: When revenue equals total costs

■ **TIP:** Always overestimate costs and underestimate revenue in your projections. It is better to exceed conservative targets than to fall short of optimistic ones. Investors appreciate realistic, well-researched financial plans.

How to Use These Templates

1. Choose the template closest to your business model
2. Replace all [bracketed] text with your specific information
3. Research your market thoroughly before filling in projections
4. Have an accountant review your financial section
5. Keep the executive summary compelling and concise (1-2 pages)
6. Update your business plan quarterly as conditions change
7. Use the plan to guide decisions, not just to secure funding

These templates provide the structure you need to create a professional business plan. Customize each section to reflect your unique business, market, and goals. A well-crafted business plan is your roadmap to success.
